Abrisa Technologies Produces New Corporate Capabilities Video

Santa Paula, CA – Abrisa Technologies, a leading manufacturer of precision optical components and optical coating with 80+ years of experience is pleased to announce that their new corporate capabilities video has been completed. According to Jim Schmeling, National Sales Manager for [Abrisa Technologies](http://www.abrisatechnologies.com), “This video allows our company to provide a quick overview of the products and services we provide to both current and potential customers>”

The video will be available for viewing on the company website, you tube, at trade shows, and other venues as well in order to showcase the how Abrisa Technologies and its divisions; [Abrisa Industrial Glass](http://www.abrisatechnologies.com) (AIG), [Sycamore Glass Components](http://www.abrisatechnologies.com) (SGC) and [ZC&R Coatings for Optics](http://www.abrisatechnologies.com) (ZCR) can provide integrated optics solutions.

The video is titled “[Technology in Action](#)” and explains how the company’s products enable a better world via the use of their glass & coatings in real world applications such as:

- Medical Imaging & Diagnostic Equipment
- Traffic & Surveillance Cameras
- GPS Displays
- Cockpit Displays
- In-flight Entertainment
- Digital Kiosks
- Touch Screens & Displays
- Photovoltaics
- Museum & Architectural Lighting
- 3D and IMAX Optics
- Navigation Displays

- more -
